Methodist Open New Educational Wing

Tragic Accident
Claims Life Of
Atty. Terry Gibson

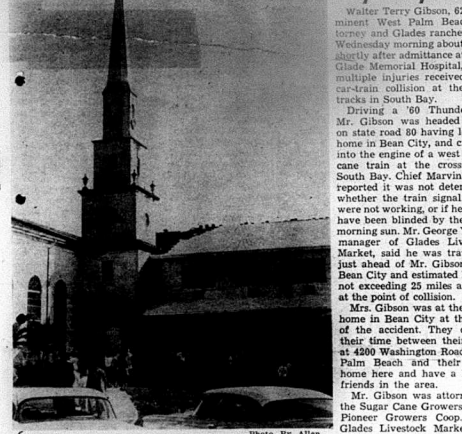

Photo By Allen

After a simple ceremony the new Educational Wing of Community Methodist Church was opened for inspection and use at 9:15 Christmas morning. The ceremony was attended by a large number of children, young people and adults who have all had a part in making this building dream come true and who have an interest in this beautiful new tool for Christian Education. The ceremony was directed by the Reverend Lee D. Rustin, Minister of the Church, in the church patio facing the cloister of the new building. The ceremony included Christmas carols, prayers, presentation of the building committee, presentation of the building to the Board of Trustees, and the cutting of the ribbon. Everyone who examined the building said it was more spacious and more beautiful than they had expected it to be.

The building committee which has worked on plans and made the decisions for various details necessary in such construction is as follows: Mr. Pellon Morris, Chairman, Mrs. James Wieringo, Mr. Douglas Thompson, Mr. Emil Wolf, Mr. Russell Tucker, and Mr. Lee Rustin. The committee has been at work in one way or another for nearly two years since definite decisions were made to proceed with construction.

Some of the highlights expressed by visitors Sunday morning were: The children's size housekeeping furniture in the two and three year old rooms, the beautiful, spacious, and well furnished crib room for infants, the modern fiber glass chairs throughout, and the kitchenette for the Junior High Department.

It is noted that the building is not yet complete. Tack boards and picture rails are yet to be installed inside the building and considerable work such as fill and landscaping must be done outside. One addition yet to be completed is the forming of a fill on the south end with a fence around it and completely added to allow the two and three year olds to open the big sliding glass doors and walk out into a play yard. Jameson Hall will be painted to correspond with the new building. When these details are completed, Community Methodist Church will have a complete plant with all of the facilities needed by a progressive, modern church. It is a comfortable and beautiful plant dedicated to the glory and use of God.

Rotary Enjoys Singing

Of Prison Farm Group

Rotarians joined enthusiastically in singing Silent Night with the chorus of the Prison Farm during a program given for the Belle Glade Rotary Club Friday when the club and a group of visitors were guests of Superintendent Garrie Carlee.

Following a beautiful and most tasty lunch prepared and served under the direction of Chief Stewart Phillips, the chorus entertained the group.

The hostess of the event, Mrs. Arthur Phillips, is a regular member of the group who can read music, and the group was added to the "natural ability" to sing, the work of the group more admirable.

The closing song was one composed by the director, and was most heartily received. The chorus seemingly tried to make the leader's work go over with a bang - and it did.

Florida Plans Big Dike Ceremonies

L. Roy Anderson, general chairman of the State-wide Dedication Committee (left) at Clewiston with local and U. S. Army Corps of Engineers officials, where local plans were completed to handle the some 10,000 crowd expected there January 12 when the giant Lake Okeechobee levees are dedicated in honor of former President Herbert Hoover. This picture was taken on top of the levees at Clewiston, at the site where the dedication plaque is to be erected. Mr. Hoover, now 86, was responsible for the construction of the giant levee after he visited the area in 1929 following the disastrous floods of 1928 and 1929, when thousands lost their lives. Left to right, next to Anderson, are Clewiston Mayor T. H. Jonday, guiding plans, U. S. Sugar Co. executive W. L. Lanier, and A. Mulberg, at her home were refreshments were enjoyed.

"The Public Interest"

Despite the coldly legalistic representations made by the Chairman of the Federal Communications Commission, his quoted statement of the Supreme Court, and Mr. Robert E. Lee's statement that the program "accurately indicated the conditions of a large number of migrant farm workers," we do not believe in the infallibility of either the Justice, or the Vice President defending his job and company.

The Chairman of the Commission included the words "public interest" as his Commission's duty to protect, and he referred to the "honest and prudent judgment" of a network.

The FCC Chairman also says "not well received in your area," indicating hurt and anger of a small community.

The City Commission's resolution did not base its complaint on a community's hurt, but on the general "public interest."

The resolution directly challenged the "honest and prudent judgment" of the licensee.

The film story does great harm in the destruction of regard for news media, and this rapacious inroad on the average citizen's belief in authority is given impetus when it remembers payola and shell programs.

How far will automatic disregard of basic truth in sound and photographic news media take us, unless federal policing is vigorous?

Spinal Defects Termed Overlooked Illness Cause

Have you tried everything for your aches and pains and still found no cure? The reason you continue to suffer may be an overlooked cause of illness. Recently for example, German medical men reported spinal defects in 86 of 100 ulcer patients. These doctors also reported remarkable recoveries of health when the spinal defects were corrected.

Chiropractors, for many years, have been calling attention to spinal defects in persons with ulcers, heart trouble, arthritis and many other ailments. What is the relationship between the spine and health? All cells, organs and muscles are controlled by the nervous system. The spine protects the nerves as they flow from the brain to various parts of the body.

A spine that is pinched vital nerves as they branch out through spinal openings. Chiropractors are specialists in correcting spinal defects and should be consulted at least once a year.
